

MANAGEMENT & ADVISORY CONSULTING

Industry Knowledge, Experience and Credibility

Dynamic Risk is recognized across North America by, and strongly affiliated with, the Oil & Gas industry. Its Executive Leadership Team (ELT) and principals are all industry experts. Collectively, we bring substantial industry knowledge, experience, analytical discipline, risk management know-how, management systems proficiency and regulatory credibility to each of our clients.

STRATEGIC/MANAGEMENT CONSULTING

Our team of experts have decades of industry experience in operational risk and integrity services. We partner with the best experts in their field to provide strategic guidance and consulting services that accurately meets project requirements.

INDUSTRY COMPARATIVE ANALYSIS & BENCHMARKING

We provide complete in-depth research and analysis to obtain an accurate industry comparison of client integrity and risk management programs. Our extensive client base across North America provides knowledgeable access to best practices and innovative solutions applied across the industry.

ENTERPRISE RISK MANAGEMENT

Our expertise includes both quantitative and qualitative assessments and scenario analysis. We can provide insight into potential areas where risk exceeds corporate thresholds for further evaluation and mitigation planning.

MERGERS & ACQUISITION SUPPORT

Our team brings integrity and risk management expertise, operational working knowledge and regulatory compliance awareness to support your asset acquisition initiatives and due diligence programs.

INTEGRATION STRATEGY & EXECUTION

We can provide expert advice and recommendations to ensure efficient and on-time program solution implementation.

Our services include long range planning, data management strategy development, data integration and work flow design.

EXPERT WITNESS SUPPORT

We have key experts that can provide strategic advice and support involving any pipeline integrity related litigation procedure. Our offering includes advice, support and analysis required to support litigation and legal processes.

DOT REGULATORY AUDIT

Our team of professionals provide consulting services for company-wide operations, maintenance, safety and compliance programs, including DOT regulatory audit preparation, audit support and audit findings response planning.

ABOUT US

Dynamic Risk's technology and consulting services optimize risk-informed decision making to manage risk through an asset's entire life cycle. Our IRAS platform models pipeline systems to proactively determine where they are most likely to fail and the corresponding consequences of unintended releases. From gathering systems, midstream pipelines, transmission pipelines, and distribution networks, we have software applications and in-house engineering expertise to provide complete pipeline risk assessment, data management and compliance reporting.
