

ATCO has more than 100 years of experience delivering natural gas safely and reliably. Our people have a deep understanding of the systems and infrastructure needed for the transmission and distribution of natural gas. ATCO's Integrity Services team leverages that expertise to develop any or all components of a comprehensive pipeline integrity program. We provide our customers the information and peace of mind you need to manage your pipeline systems with confidence. This includes:

- Turn-key integrity solution customized for you
- Pipeline dig, assessment and repair
- In-Line-Inspection (ILI) management and facilitation
- Corrosion control
- Hot tapping and isolation
- In-service welding and fabrication

Dynamic Risk

Dynamic Risk's technology and consulting services optimize risk-informed decision making to manage risk through an asset's entire life cycle. Our IRAS software models pipeline systems to proactively determine where they are most likely to fail and the corresponding consequences of unintended releases. From gathering systems, midstream pipelines, transmission pipelines, and distribution networks, we have software applications and in-house expertise to provide complete pipeline risk assessment, data management and compliance reporting.

YOUR PRODUCT,
WE'LL FOCUS
ON YOUR
PIPELINES.

OUR CORE: COMPREHENSIVE PIPELINE INTEGRITY SERVICES

A fully customizable, one-stop solution. Integrate new modules as your needs dictate.

Who we are

ATCO and Dynamic Risk have partnered to form a team of pipeline integrity specialists that offer a full suite of services to help you improve operations, increase reliability, and optimize operating costs.

Our extensive experience has created a depth of knowledge unparalleled in the industry that is at your fingertips.

We offer a broad range of services from managing and analyzing data to field services to overall integrity planning and reporting. No work is too small or too large because we are designed to scale to your needs.

What is the value to you?

- Extensive risk assessment and field experience
- Quality and safe execution that is 100% regulatory compliant
- Single point of accountability for any size of project
- Ease of procurement and contract management
- Ability to identify and respond to high-risk threats and protect against them
- Access to an extensive knowledge base for integrity decision making
