

ARE YOU CONFIDENT YOUR PIPELINE ASSETS MEET REGULATIONS?

While operating pipelines might not be your main business, all pipeline owners are expected to comply with industry regulations mandated by both the Alberta Energy Regulator (AER) and the Canadian Standards Association (CSA).

Owning and operating a vast pipeline infrastructure means we are specialists in pipeline compliance. This means our in-house expertise can help alleviate the resource requirement needed from your business by providing on-demand service when you need it, where you need it.

ARE YOU COMPLIANT?

This check-list outlines current regulations imposed by the AER and CSA:

| Action | Frequency |
|---|---------------|
| CP System Check | One time only |
| CP Survey | Annual |
| ROW Inspection | Annual |
| Leak Survey | Annual |
| ILI Inspection | As required |
| Risk Assessment | Annual |
| Update Integrity Management Plan Documents | As required |
| Verify Leak Detection System (Liquids only) | As required |
| Depth of Cover Survey | As required |
| Valves and fittings inspection | Annual |

Benefits

Our expertise in pipeline compliance delivers these benefits:

- Reduce risks and incidents
- Mitigate physical damage to pipelines such as corrosion and mechanical damage
- Protect the safety of public and environment
- Reduce asset downtime and lost revenue

Potential Risks

Failure to comply with these actions can result in the following risks:

- Incidents compromising safety of public and/or employees
- Loss of revenue
- Pipeline leaks & ruptures
- Regulatory Fines and Penalties
- Loss of reputation
- Suspension of operations

WHY ATCO & DYNAMIC RISK?

ATCO and Dynamic Risk have partnered to form a team of pipeline operations and integrity specialists that offer a full suite of services to help you improve operations, increase reliability and optimize operating costs. Our extensive industry expertise has created a depth of knowledge unparalleled in the industry at your fingertips. Our joint service offering ranges from managing and analyzing data, to field services, and finally to overall integrity planning and reporting. There is no limit to project size, as our solution scales to meet your precise business needs.

BENEFITS

Flexible and Customizable

Select from any of the available services to meet your needs

Resource Expertise

Augment existing field and office staff with a team of pipeline integrity experts on an "as-needed" basis

Strategic Investment

Focus spending only on high priority areas, where and when it is required

Protect Capital

Ensure asset reliability and reduce operation downtime

Ensure Safety

Enhance safety measures outside of plant operations

Regulatory Compliance

Adhere to regulations and proactively prepare for future mandates
