

## ASSET INTEGRITY MANAGEMENT POWERED BY TECHNOLOGY

The global leader in innovative solutions for the safe and efficient delivery of energy resources

Dynamic Risk provides industry leading consulting, engineering assistance and technology solutions by optimizing risk-informed decision making. We partner with our clients to eliminate pipeline failures by effective identification and assessment of threats and consequences, by managing risk throughout the pipeline system life cycle.

Striving for continuous improvement is one of our core values and we commit to providing software and consulting solutions that enable our customers to achieve exceptional efficiency and safety performance while meeting your ESG program and compliance objectives.

### SERVICES & SOLUTIONS FOR

- Improved safety and environmental protection
- Greater system reliability
- Optimized asset performance
- Lower operational costs

Our team brings substantial industry knowledge, experience, analytical discipline, pipeline integrity management system know-how, management systems proficiency, and regulatory credibility to our business, and to each of our clients. We use our expertise and experience to ensure our services and software continually evolve to meet client and regulatory demands.

LIFE CYCLE**

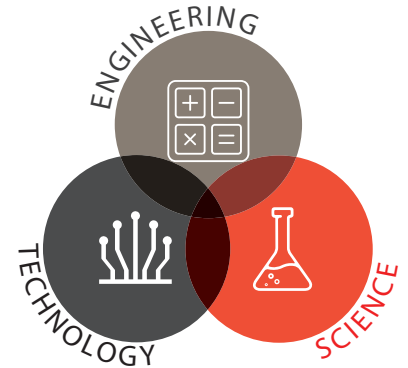

Dynamic Risk was founded in 1996 to revolutionize pipeline risk management across North America. We have been evolving our industry-leading expertise to meet your needs ever since.

A company's success depends on making good decisions. The foundation of these decisions is accurate and timely data-driven information and analysis. Our consulting, along with our IRAS platform, optimize risk-informed decision making through an asset's entire life cycle.

### OPERATORS OF 50% OF THE PIPELINE MILEAGE IN THE U.S., AND 75% OF TRANSMISSION/MIDSTREAM PIPELINE MILEAGE IN CANADA, COUNT ON DYNAMIC RISK.

They trust our IRAS software and risk and integrity management services to make important decisions with confidence and realize efficiencies across their asset's entire life cycle. From gathering systems, midstream pipelines, transmission pipelines and distribution networks, we have the leading in-house expertise to provide complete pipeline risk assessment, data management and compliance reporting.

#### ABOUT US

Dynamic Risk's technology and consulting services optimize risk-informed decision making to manage risk through an asset's entire life cycle. Our IRAS platform software models pipeline systems to proactively determine where they are most likely to fail and the corresponding consequences of unintended releases. From gathering systems, midstream pipelines, transmission pipelines, and distribution networks, we have software applications and in-house engineering expertise to provide complete pipeline risk assessment, data management and compliance reporting.

Dynamic Risk is part of Eddyfi/NDT, an innovative industrial technology group focused on advanced diagnostic technologies to monitor the world's infrastructure health. The company employs over 1,200 people throughout 25 offices worldwide and serves clients in more than 110 countries.
