

TURN-KEY PIPELINE LIFE-CYCLE INTEGRITY MANAGEMENT

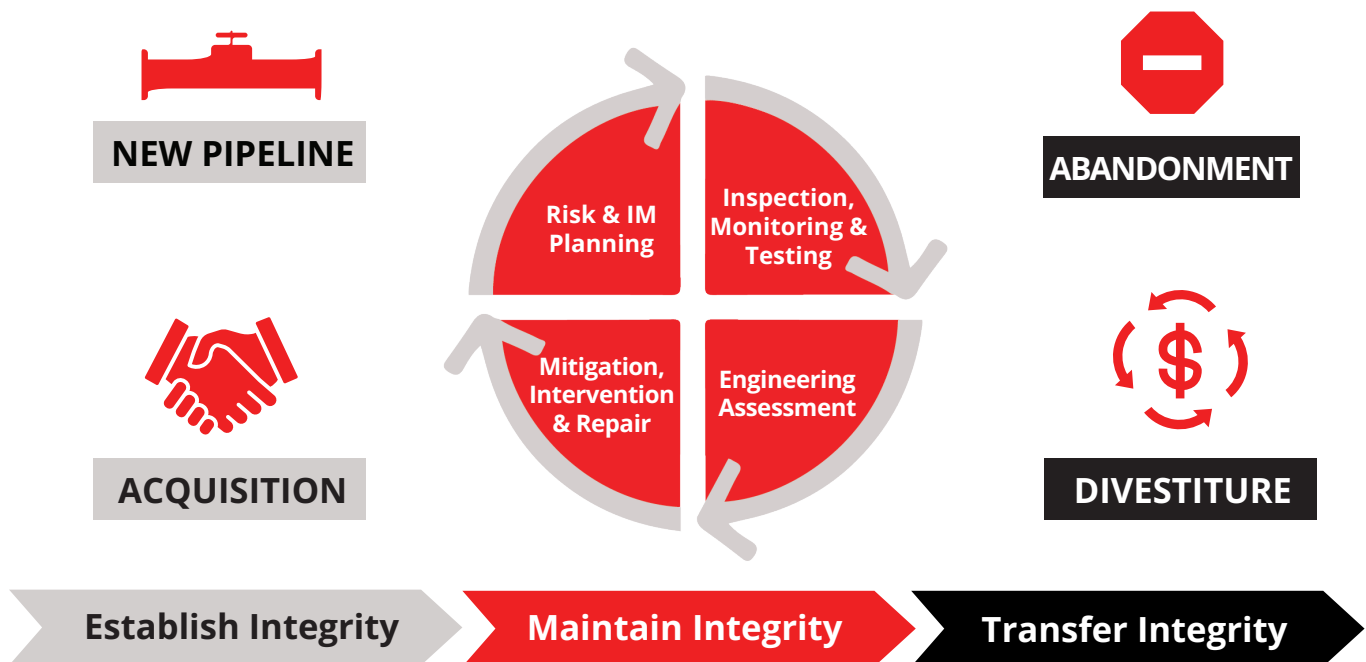

Pipeline operators are recognizing the need to have an improved understanding of their managed assets to support critical ESG considerations and associated targets. Having a dedicated Integrity Management process in place to assess the current health of your asset infrastructure will improve the performance of your pipeline operations through mitigating potential risks, ensuring public safety, adhering to regulator requirements and protection of your capital investment.

Dynamic Risk provides turn-key integrity management services across the full pipeline asset lifecycle from design to decommissioning. Our technology enabled solutions can be quickly and efficiently deployed, providing operators a streamlined integrity management system that improves your bottom line.

BENEFITS:

- **Industry Resource Expertise** – Augment existing internal resources with a team of pipeline integrity experts
- **Regulatory Compliance** – Proactive approach to meet current industry regulations and everchanging new mandates
- **Asset Safety and Reliability** – Reduce potential risks and improve pipeline performance through accurate inspection data analysis
- **Protection of Capital Investment** – Improve allocation of integrity spend with a focus on high-risk assets
- **Turnkey Solution** – Access to a flexible and scalable service to best meet your business needs

Our scalable and flexible solution fully enables the **Establishment, Maintenance and Transfer of Integrity** for the full life cycle of your midstream assets.

LIFE CYCLE INTEGRITY MANAGEMENT SUPPORT

ABOUT DYNAMIC RISK

Dynamic Risk's technology and consulting services optimize risk-informed decision making to manage risk through an asset's entire life cycle. Our IRAS platform software models pipeline systems to proactively determine where they are most likely to fail and the corresponding consequences of unintended releases. From gathering systems, midstream pipelines, transmission pipelines, and distribution networks, we have software applications and in-house engineering expertise to provide complete pipeline risk assessment, data management and compliance reporting.

Dynamic Risk is part of Eddyfi/NDT, an innovative industrial technology group focused on advanced diagnostic technologies to monitor the world's infrastructure health. The company employs over 1,200 people throughout 25 offices worldwide and serves clients in more than 110 countries.
